Course description & objectives

- Diagnosis and management of CSOM with and without cholesteatoma
- Surgical management of external auditory canal stenosis
- Surgical management of otosclerosis: primary and revision surgery including intraoperative complications and difficult surgical presentations such as obliterative otosclerosis, dehiscent VIIth nerve and malleus ankylosis
- Congenital malformations of the ossicular chain
- Recent technical advances in ossicular reconstruction
- Indications and innovations in implantable hearing devices
- Laser in Otology: Argon, CO2 with Omniguide and Microwave Revolix
- New tools and concepts for prospective evaluation and audit in otology

The live surgery sessions will demonstrate the techniques for otosclerosis, CSOM, ossiculoplasty and implantable hearing aids used at the Causse Ear Clinic. Recent advances and new original techniques will be demonstrated.

The format of the panel discussions with case presentation (**The Grand Inquisition**) will allow interactive discussion with the audience. The use of an interactive vote system will promote lively controversial and educational debate. Specific questions to the panel can be submitted on-line in advance by the delegates (www.clinique-causse.com/course2009).
