

The Annual Causse Ear Clinic International Otology Course 2025

Colombiers

July 3-5 2025

clinique-cause.com/course2025

Scientific Program (Preliminary)

Stapes Surgery, Ossiculoplasty, Endoscopic Ear Surgery, Implantable Hearing Devices, Innovatives Techniques & Therapies and more...

Join us for an inspiring three-day program featuring keynote speakers, lectures, panel discussions, and networking opportunities with leading experts in otology from around the globe. Attendees will be able to engage in 10 live surgery sessions, 22 lectures and 2 high quality interactive panel discussions with case presentation to showcase the latest advancements in clinical and surgical practices, research and innovative technologies.

Our goal is to advance the field of otology by disseminating and sharing various cutting-edge surgical techniques and research, fostering professional collaboration, and enhancing clinical practices to improve otology outcomes globally. In addition, there will be a poster presentation session inviting researchers and students of all levels of experience to submit posters online.

We look forward to welcome you to the Causse Ear Clinic.
